Example 3 – Grade 3 Elementary School – Building of Instruction -- Golden Package

The Math of Golden Packages

Student Tested Population EQUALS Full Academic Year Students + Less Than a Full Academic Year Students (Sep 2011 – Jun 2012) + Less Than a Full Academic Year Students (Sep 2012 – Oct 2012)

Building of Instruction Golden Package Math

BOI GP = (Student Tested Population – Less Than a Full Academic Year (Sep 2012 – Oct 2012)) – Less Than a Full Academic Year (Sep 2011 thru Jun 2012)

Total Student Tested Population = 53

Full Academic Year (Sep 2011 – Jun 2012) = 37

Less Than a Full Academic Year (Sep 2011 – Jun 2012) = 6

Less Than a Full Academic Year (Sep 2011 – Oct 2012) = 10

BOI GP = (53 – 10) = 43 - 6 = 37 Students Reported on out of 53 Students Tested

In Test Record Count You See 43 Total Test Records, even though 53 were tested, you see only 6 students identified as Less Than a Full Academic Year even though there is a total of 16
